Qii HRMS v1 Software Requirements Specification

Oct 28, 2026 · @SYED SAMI

This SRS defines what Qii Creative's HRMS v1 must do, based on the 12 Oct build specification, the client feedback of 19 Oct 2026 and the clickable prototype. Version 1.0, for client sign-off.

1. Introduction

1.1 Purpose

This document specifies the software requirements for the Human Resource Management System (HRMS) v1 that NexAI Analytics is building for Qii Creative. It is written for Qii's management (Asman, Fayaz) to sign off scope, and for the design, development and test team to build and verify against.

1.2 Scope

HRMS v1 is a web application, usable on phone and desktop, that replaces spreadsheets and ClickUp-based HR tracking for Qii's Bangladesh and Australia teams. It covers:

- Sign-in with Google and role-based access to every page and action
- Organisation structure, reporting hierarchy and employee records with documents
- Work schedules (5-day, 6-day, custom and hourly), daily check-in and check-out, and worked hours
- Tasks and mandatory daily work logs
- Leave categories, balances, multi-step approval and a per-team daily leave limit
- Salary records and monthly payroll calculated from attendance and leave
- Holiday calendars, onboarding and offboarding checklists
- In-app and email notifications, including a monthly attendance report emailed to every employee
- An admin dashboard, exportable reports and an audit log

Out of scope for v1: hiring, KPI scoring and bonus (in the project-management release), tax and statutory deductions, bank payment files, a client portal and native mobile apps (section 16).

1.3 Definitions

Term	Meaning
Admin	A user holding the Admin or Super Admin role
Approval chain	The ordered list of approvers a leave request passes through
Absent day	A working day with no check-in and no approved leave covering it
Check-in / check-out	The employee's start and end of work, recorded in the system (also called punch in and punch out)
Data scope	How far a granted permission reaches: Own records, Team (direct and indirect reports) or All
Hourly employee	An employee on an hourly schedule, paid hours worked × rate, with no fixed days
Leave category	An admin-defined leave type with quota, validity period and rules, e.g. Casual Leave
Payroll run	The monthly pay calculation for all employees, first a draft, then finalised
Work log	An employee's entry of time spent on an assigned task on a given day
Working day	A day in the employee's schedule that is not a holiday on their location's calendar
Worked hours	Check-out time minus check-in time for a day

1.4 References

- Qii HRMS v1 Build Specification, 12 Oct 2026, updated with client feedback of 19 Oct 2026
- Qii HRMS clickable prototype, version 2 (19 Oct 2026)

- Qii current-state analysis and client questionnaire, 8–10 Oct 2026

1.5 Conventions

- Each requirement has an ID: FR (functional), BR (business rule), NFR (non-functional), DR (data), IR (interface).
- **Must** means required for go-live. **Should** means planned for v1 but can slip to v1.1 with Qii's agreement.
- Figures shown as examples (hours, quotas, salaries) are admin settings, not fixed values.

2. Overall description

2.1 Product perspective

HRMS v1 is the first release of a single Qii platform. The project-management release that follows will reuse the same employee, team and role records, replace the stand-in task list with client projects, and add KPI scoring and bonus. HRMS v1 must therefore keep the employee table, roles and tasks in a shape the project module can extend.

2.2 Users and roles

Access is role-based and fully configurable. These five roles ship as defaults:

Role	Typical holders	Main work in the system
Super Admin	Asman	Everything, including role management. Cannot be removed from the last holder
Admin	Fayaz	All settings, employee records, salary, payroll, approvals on behalf of others
HR	Fatiha	Employee records, documents, leave setup, attendance corrections, holidays, checklists, reports. No salary by default
Manager	Team leads (Redwan, Niloy, Nafis, Sameen, Fardin)	Approve team leave and corrections, see team attendance and work logs, assign tasks

Role	Typical holders	Main work in the system
Employee	Everyone	Check in and out, keep a work log, request leave, see own records, payslips and monthly reports

A person can hold several roles; their access is the widest of them.

2.3 Operating environment

- A responsive web application for current Chrome, Safari, Edge and Firefox on desktop, and Chrome and Safari on Android and iOS phones
- Hosted in the cloud with HTTPS only; data stored in one region chosen with Qii
- Two locations and time zones at launch: Bangladesh (Asia/Dhaka) and Australia (Australia/Darwin)
- Two pay currencies at launch: BDT and AUD

2.4 Design and implementation constraints

- Sign-in only through Google accounts on the qiicreative.com.au domain
- Every policy value (quotas, hours, limits, rules) is admin-editable; none is hard-coded
- No money penalties for lateness in v1
- Payroll calculates gross pay and attendance-based deductions only; tax and statutory items are out of scope

2.5 Assumptions and dependencies

- All staff, including contractors, have an @qiicreative.com.au Google account
- Qii's admin enters employees, schedules, holidays, leave categories, opening balances and salaries before go-live
- Qii provides a sending address and email service for notifications and monthly reports
- Employees have a phone or computer with a browser on every working day

3. Authentication and access control

ID	Requirement	Priority
FR-AUTH-01	The system shall let users sign in only with Google, and only with accounts ending in @qiicreative.com.au	Must
FR-AUTH-02	The system shall refuse a Google account that has no employee record, with the message "This Google account has no employee record. Ask HR to add you first."	Must
FR-AUTH-03	The system shall refuse sign-in for employees whose status is Inactive, Resigned or Terminated, and end their open sessions at their next request	Must
FR-AUTH-04	The system shall link the Google account to the employee record on first sign-in by matching the work email	Must
FR-AUTH-05	A signed-in user with no role shall see only an "Access pending" page	Must
FR-AUTH-06	Sessions shall last 7 days on a device; an admin can end any person's sessions	Must
FR-AUTH-07	One Super Admin account shall be created at deployment; the Super Admin role cannot be removed from its last holder	Must
FR-ACC-01	Admins shall create, rename and delete roles, and copy an existing role as a starting point. System roles cannot be deleted	Must
FR-ACC-02	For each role, admins shall grant per feature any of the actions View, Create, Edit, Delete, Approve and Export, each with a data scope of Own, Team or All (Appendix B)	Must
FR-ACC-03	Admins shall assign one or more roles to each person; access is the union of their roles	Must

ID	Requirement	Priority
FR-ACC-04	Pages and actions a user has no permission for shall be hidden from navigation and refused if reached directly	Must
FR-ACC-05	Team scope shall cover the user's direct and indirect reports, resolved from the reporting hierarchy on the day of the request	Must
FR-ACC-06	Every sign-in, failed sign-in, role change and permission change shall be written to the audit log with time and IP address	Must

4. Organisation, hierarchy and employee records

4.1 Organisation and hierarchy

ID	Requirement	Priority
FR-ORG-01	Admins shall create departments, and teams within a department, each team with one team lead	Must
FR-ORG-02	Admins shall maintain locations, each with country, time zone, holiday calendar and default currency. Bangladesh (Dhaka) and Australia (Darwin) ship at launch	Must
FR-ORG-03	Each team shall have a maximum number of people on leave per day (default 1; 0 means no limit) and an action when exceeded: alert or block (FR-LV-14)	Must
FR-ORG-04	Each employee shall have exactly one direct manager, except the top of the hierarchy	Must
FR-ORG-05	The system shall refuse a manager change that makes someone report to their own direct or indirect report	Must
FR-ORG-06	A manager change shall take an effective date; the system keeps reporting-line history so past approvals and scopes stay correct	Must

ID	Requirement	Priority
FR-ORG-07	The system shall draw an org chart from the reporting lines	Should

4.2 Employee records

ID	Requirement	Priority
FR-EMP-01	HR or Admin shall create employees with the fields in section 12; required fields must be filled before the record is Active	Must
FR-EMP-02	The employee ID shall be generated automatically (format QII-0001)	Must
FR-EMP-03	The work email must be unique and end in @qiicreative.com.au	Must
FR-EMP-04	Contractors and interns must have a contract or internship end date	Must
FR-EMP-05	Choosing a team shall set the department automatically	Must
FR-EMP-06	Employees shall edit only their own phone, personal email, address and emergency contact	Must
FR-EMP-07	Every change to employment fields shall keep the old value, new value, editor and date in the employee's history	Must
FR-EMP-08	HR shall upload documents with type (Contract, NDA, Agreement, ID copy, Certificate, Other) and optional expiry date. Every open and download is logged	Must
FR-EMP-09	Status values: Active, On leave, Inactive, Resigned, Terminated	Must

ID	Requirement	Priority
FR-EMP-10	Setting Resigned or Terminated requires an exit date, a reason, a completed offboarding checklist (or an admin override with reason), and reassignment of the person's direct reports and pending approvals	Must
FR-EMP-11	Nobody shall deactivate their own account, and the last Super Admin cannot be deactivated	Must
FR-EMP-12	The add-employee form shall capture work pattern (location default, 5 days, 6 days, hourly) and, for users with salary permission, pay type and amount	Must

5. Work schedules, attendance and work hours

5.1 Work schedules

ID	Requirement	Priority
FR-SCH-01	Admins shall set a schedule per location, with optional overrides per team and per employee. A person's schedule overrides their team's, which overrides the location's	Must
FR-SCH-02	A fixed schedule shall define working days of the week, office start and end, late grace period (minutes), half-day threshold (hours) and missing check-out cut-off. Example: Bangladesh Sun–Thu 10:00–18:00, 15 minutes grace	Must
FR-SCH-03	Any number of working days per week shall be supported, so 5-day and 6-day employees can coexist in one team	Must
FR-SCH-04	An hourly schedule shall have no fixed days or hours, and an optional expected hours per week	Must
FR-SCH-05	Expected hours for a fixed-schedule day = office end − office start; 0 on weekly days off and holidays; half on a half-day leave; 0 on full-day leave	Must

ID	Requirement	Priority
FR-SCH-06	Expected hours for an hourly employee over a period = weekly hours × days in the period ÷ 7	Should

5.2 Check-in and check-out

ID	Requirement	Priority
FR-ATT-01	Every employee shall check in and check out in the system, once each per day, from any place	Must
FR-ATT-02	The system shall store server time in the person's time zone, browser location if allowed, IP address, device type and an optional note. A refused location is saved as "Location not shared" and never blocks the check-in	Must
FR-ATT-03	A check-out up to 6 hours after midnight shall count for the previous day	Must
FR-ATT-04	Check-out shall follow the work log rule (FR-WL-05)	Must
FR-ATT-05	The system shall set each day's status automatically (Appendix A): Present, Late, Half day, Missing check-out, Absent, On leave, Holiday, Weekly off; hourly employees get Worked or No shift only	Must
FR-ATT-06	Late and Absent are reported only; there are no lateness penalties in v1. Absences affect pay only through payroll (section 8)	Must
FR-ATT-07	An employee shall request a correction with the real times and a reason; their manager approves or rejects it. The original times are kept	Must
FR-ATT-08	HR with edit permission shall edit any other person's record with a reason. Nobody edits or approves their own attendance	Must

5.3 Worked hours

ID	Requirement	Priority
FR-HRS-01	Worked hours for a day shall equal check-out minus check-in (crossing midnight allowed)	Must
FR-HRS-02	While checked in today, worked hours shall count live up to the current time	Must
FR-HRS-03	A day with a check-in and no check-out shall count 0 hours until corrected, and be flagged Missing check-out	Must
FR-HRS-04	Employees shall see their worked, expected and logged hours for today, this week and each month	Must
FR-HRS-05	Managers shall see worked and logged hours per person on the team attendance view	Must

6. Tasks and work logs

Work logs record what each person did against their assigned tasks. Until the project-management release, tasks are a simple list inside the HRMS; that release replaces them with project tasks and keeps the logs.

6.1 Tasks

ID	Requirement	Priority
FR-TSK-01	Managers and admins shall create tasks with title, client or project, one or more assignees, due date and status (Open, In progress, Done)	Must
FR-TSK-02	A manager may assign tasks only to people in their task-create scope (by default, their team)	Must
FR-TSK-03	The task list shall show the total time logged against each task and flag overdue tasks	Should

ID	Requirement	Priority
FR-TSK-04	The task table shall carry an identifier the project module can map to project tasks without losing logs	Must

6.2 Work logs

ID	Requirement	Priority
FR-WL-01	An employee shall add work log entries for a date: task, time spent (in 15-minute steps, at least 0.25 h) and a description	Must
FR-WL-02	Entries shall be allowed only against open tasks assigned to that employee	Must
FR-WL-03	An employee may add or delete entries for today and up to N days back (admin setting, default 7). Older entries are read-only	Must
FR-WL-04	A day shall not exceed 16 logged hours. Logging more than the punched hours plus 1 hour is allowed but flagged	Must
FR-WL-05	Work log rule (admin setting): **Block** (default), check-out is refused until the day has at least one entry and, if set, the logged time covers a minimum % of worked time; or **Flag**, check-out is allowed and the missing log is flagged	Must
FR-WL-06	A worked day with no work log shall notify the employee and their manager, once per day, for the last 3 days	Must
FR-WL-07	Managers and admins shall view logs for people in their scope over a date range, next to punched and worked hours, with a filter for days with no log	Must
FR-WL-08	The employee record shall show the person's last 14 days of logs to users with work-log view permission	Should

7. Leave management

7.1 Leave categories and balances

ID	Requirement	Priority
FR-LV-01	Admins shall create leave categories with name, quota in days, validity period (start and end date), paid or unpaid, and who it applies to (locations, employment types, teams, named people; empty means everyone). Example: Casual Leave, 10 days, 1 Jan to 31 Dec	Must
FR-LV-02	Each category shall set: half days allowed, attachment required (never, always, or after N days), minimum notice, maximum days per request, pro-rata for new joiners, carry-over (none, all, or up to a cap with expiry date) and negative balance allowed (days)	Must
FR-LV-03	Hourly employees shall not receive day-based leave categories	Must
FR-LV-04	Balance per person and category = quota (pro-rated if set) + carried + adjustments − taken − pending. Taken includes the opening balance entered at go-live	Must
FR-LV-05	HR shall adjust a balance up or down with a mandatory reason; adjustments are listed and audited	Must
FR-LV-06	A category can be renewed for the next period by copying it. Changing a quota mid-period updates every balance and is logged	Must
FR-LV-07	At period end the system shall preview each person's carry-over under the category rule, and HR confirms before the next period opens	Should

7.2 Requests and approval

ID	Requirement	Priority
FR-LV-08	An employee shall request leave with category, dates, full day or first or second half (single date only), reason and attachment	Must
FR-LV-09	Before submitting, the system shall show the working days counted, the balance after the request, the approvers, and any warnings	Must
FR-LV-10	Days counted shall exclude the person's weekly days off and their location's holidays; a half day counts 0.5	Must
FR-LV-11	The system shall refuse a request that overlaps another pending or approved request, exceeds the balance (beyond the negative allowance), breaks the notice or maximum rules, lacks a required attachment, or falls outside the category's period	Must
FR-LV-12	Each category shall have an ordered approval chain of up to 4 steps. A step is: direct manager, manager's manager, a named person, or anyone holding a chosen role. Default chain: direct manager, then Fayaz	Must
FR-LV-13	A step shall be skipped when its approver is the requester, is the same as the previous step, holds no one, or is inactive. Example: Fayaz's own request goes to Asman only	Must
FR-LV-14	Team leave limit: if a request would put more people from the same team on leave (pending or approved) on any working day than the team's limit, the system shall warn the employee, mark the request on the approval card, and notify the manager, team lead and first approver. If the team's action is Block, the request is refused	Must
FR-LV-15	Any approver can reject with a mandatory reason, which ends the request. Approval at the last step approves it	Must

ID	Requirement	Priority
FR-LV-16	An approver idle for 2 working days shall be reminded, and admins notified. Admins may approve on the approver's behalf; the log records who acted	Must
FR-LV-17	An approver may name a covering delegate for a date range, who can then approve requests waiting for them	Should
FR-LV-18	An employee may withdraw a pending request. Cancelling an approved request goes through the same chain; days return when approved	Must
FR-LV-19	Approved leave shall appear on the attendance record and on a team leave calendar with holidays; pending requests appear dashed	Must

8. Salary and payroll

8.1 Salary records

ID	Requirement	Priority
FR-SAL-01	Users with salary edit permission (management only by default) shall enter pay type (monthly or hourly), amount in the employee's currency, effective date and reason	Must
FR-SAL-02	Every salary change shall be kept in a salary history and the audit log	Must
FR-SAL-03	Employees shall see their own current pay, finalised payslips and a month-to-date estimate. Nobody else sees salary without permission	Must

8.2 Payroll calculation

ID	Requirement	Priority
FR-PAY-01	The system shall calculate a payroll row for every person employed for any part of the month	Must
FR-PAY-02	Monthly pay: per-day rate = monthly gross ÷ working days in the month from the person's schedule (or ÷ 30, admin setting). Base pay = per-day rate × working days employed, so joiners and leavers are pro-rated	Must
FR-PAY-03	Absent days = days with status Absent (1 each) plus Half day (0.5 each), counted up to the end of the month or today, whichever is earlier	Must
FR-PAY-04	Absence rule (admin setting): **Balance first** (default), absences are covered by the remaining leave balance of the chosen categories in order (default Casual, then Annual), and only the excess is deducted; or **Direct**, every absent day is deducted	Must
FR-PAY-05	Approved unpaid leave days shall always be deducted	Must
FR-PAY-06	Deduction = (absent days not covered + unpaid leave days) × per-day rate	Must
FR-PAY-07	Hourly pay = hours worked from check-in to check-out × hourly rate. Shifts with no check-out are not paid until corrected and are flagged	Must
FR-PAY-08	Admins may add one manual adjustment per person per month (positive or negative) with a note shown on the payslip, e.g. a bonus or advance recovery	Must
FR-PAY-09	Net pay = base pay − deduction + adjustment. Totals are shown per currency	Must
FR-PAY-10	Each row shall show notes explaining exceptions: pro-rating, absences beyond balance, missing check-outs, month not over	Must

Worked example (Arpa, September 2026): monthly gross BDT 15,000; 22 working days; per-day rate BDT 681.82. She was absent 2.5 days with 1 day of Casual Leave left. 1 day is covered by leave and 1.5 days are deducted: BDT 1,022.73. Net pay BDT 13,977.27.

8.3 Payroll run

ID	Requirement	Priority
FR-PAY-11	A month's payroll shall be a live draft until finalised	Must
FR-PAY-12	Finalising shall be allowed only after the month ends, need a second confirmation, lock the numbers, take covered absences from leave balances as adjustments, and notify each employee that their payslip is ready	Must
FR-PAY-13	The system shall warn when the previous month is not finalised, because its covered absences change the balance for this month	Must
FR-PAY-14	An authorised user may reopen a finalised month; this removes its leave adjustments and returns the run to draft	Must
FR-PAY-15	The payslip shall show base pay, per-day rate or hours × rate, absent days, days covered by leave, unpaid days, deduction, adjustment and net pay	Must
FR-PAY-16	Payroll shall export to CSV for the bank or accountant	Must

9. Holidays, checklists, notifications and email

9.1 Holiday calendars

ID	Requirement	Priority
FR-HOL-01	Admins shall keep one holiday calendar per location, each holiday with name, date or date range, type (Public or Company) and an Optional flag	Must

ID	Requirement	Priority
FR-HOL-02	Non-optional holidays shall be excluded from leave day counts and expected hours, and never marked Absent	Must
FR-HOL-03	A calendar can be copied to the next year for editing	Should

9.2 Onboarding and offboarding

ID	Requirement	Priority
FR-CL-01	Admins shall maintain onboarding and offboarding templates; each item has an owner type (HR, manager, employee) and a due offset in days from the start or exit date	Must
FR-CL-02	A checklist from the template shall attach when an employee is added (optional) or when offboarding is started; each item gets a named owner and due date	Must
FR-CL-03	Item owners and HR shall tick items done; the system records who and when	Must

9.3 Notifications

The system sends each notification in the app and by email to the work address. Admins can switch each event on or off.

ID	Event	Recipients
FR-NT-01	Leave request submitted or moved to the next step	The next approver
FR-NT-02	Leave approved, rejected or cancelled	The requester, and the manager when a later approver decides
FR-NT-03	Approval waiting 2 working days	The approver, then admins

ID	Event	Recipients
FR-NT-04	Team leave limit exceeded	Manager, team lead and first approver
FR-NT-05	Attendance correction submitted or decided	Manager, then the employee
FR-NT-06	No check-in by start time + 1 hour	The employee
FR-NT-07	Missing check-out at the cut-off	The employee
FR-NT-08	Worked day with no work log	The employee, then the manager
FR-NT-09	Probation, contract or internship ending in 14 days	Manager and HR
FR-NT-10	Document expiring in 30 days	HR
FR-NT-11	Checklist item due in 2 days or overdue	The item owner
FR-NT-12	Payslip ready	The employee
FR-NT-13	Monthly attendance report emailed	The employee

Each notification shall be sent once per event; repeats are suppressed.

9.4 Monthly attendance report email

ID	Requirement	Priority
FR-MR-01	On the 1st of each month the system shall email every employee who worked any part of the previous month their attendance report	Must

ID	Requirement	Priority
FR-MR-02	The report shall show work pattern, working days, days worked, late arrivals, half days, absences, missing check-outs, leave taken by category and dates, hours worked, expected hours, hours logged, worked days with no log, and remaining leave balances	Must
FR-MR-03	Hourly employees' reports shall leave out working days, late, absent and leave lines	Must
FR-MR-04	Admins shall switch the automatic email off or on and resend any month on demand	Must
FR-MR-05	Every email shall be kept in an outbox visible to admins; employees see their own under My monthly reports	Must

10. Admin dashboard, reports and audit log

10.1 Admin dashboard

ID	Requirement	Priority
FR-DB-01	The dashboard shall show today's cards: headcount by location and type, checked in vs expected, on leave, late, pending approvals (and how many waited 2+ working days), and contracts, probation and internships ending in 30 days	Must
FR-DB-02	A work-hours table shall show, per employee, for a chosen day, week or month: work pattern, expected hours, worked hours with a progress bar, logged hours, gap (worked − expected), days present, leave days, absences, late arrivals and days with no work log	Must

ID	Requirement	Priority
FR-DB-03	The user shall move to the previous or next day, week or month, filter by location and team, and sort by name, hours worked, gap, absences, leave or missing logs	Must
FR-DB-04	Totals for the period shall show worked vs expected hours, logged share, leave days, absences, late arrivals, missing logs and missing check-outs	Must
FR-DB-05	Clicking a name shall open that person's attendance; the table exports to CSV	Must
FR-DB-06	Every figure shall cover only the people in the user's report scope	Must

10.2 Reports

All reports filter by date range or month, location, department, team and person, and export to CSV for Excel.

ID	Report	Content
FR-RP-01	Monthly attendance register	One row per person, one column per day with status codes, totals per status
FR-RP-02	Late and absence summary	Working days, late, absent, missing check-out, half days and late % per person
FR-RP-03	Leave balances	Quota, carried, adjusted, taken, pending and remaining per person and category
FR-RP-04	Leave requests log	Every request with approvers, decisions and decision times
FR-RP-05	Headcount	Month-end headcount, joiners and leavers for the last 6 months
FR-RP-06	Employee master list	All employment fields

ID	Report	Content
FR-RP-07	Payroll	The payroll run for a month (section 8)

10.3 Audit log

ID	Requirement	Priority
FR-AU-01	The system shall log, with time, actor, record, before and after values and IP address: sign-ins, role and permission changes, employment edits, salary changes, payroll adjustments, finalise and reopen, balance changes, attendance edits and corrections, leave decisions, document opens and deletions, setting changes and exports	Must
FR-AU-02	The audit log shall be read-only for everyone and searchable by person, action or record	Must

11. Business rules

These rules hold whatever roles a user has. Defaults are admin settings.

ID	Rule	Default
BR-01	Nobody approves their own leave or corrects or edits their own attendance	Fixed
BR-02	A reporting line can never form a loop	Fixed
BR-03	The last Super Admin cannot lose the role or be deactivated	Fixed
BR-04	Late = check-in after office start + grace	Grace 15 minutes
BR-05	Half day = worked less than the half-day threshold on a working day without leave	4 hours

ID	Rule	Default
BR-06	Absent = working day, past, with no check-in and no approved full-day leave	Fixed
BR-07	Missing check-out = checked in, no check-out by the cut-off (or 06:00 next day for yesterday)	Cut-off 23:59
BR-08	A check-out before 06:00 counts for the previous day	Fixed
BR-09	Check-out needs a work log entry for the day	Block, 0% minimum
BR-10	Work logs can be added up to N days back	7 days
BR-11	Leave days exclude weekly days off and the location's holidays; a half day is 0.5	Fixed
BR-12	Approval steps skip the requester, repeats and inactive people	Fixed
BR-13	Team leave limit per day	1 person, alert only
BR-14	Approval reminder after N working days idle	2 working days
BR-15	Per-day rate for monthly pay	Salary ÷ working days in month
BR-16	Absences use leave balance before salary deduction	Casual, then Annual
BR-17	Unpaid leave is always deducted	Fixed
BR-18	Payroll can be finalised only after the month ends; months finalise in order	Fixed
BR-19	Hourly shifts without check-out are not paid until corrected	Fixed
BR-20	Contract, probation and internship reminders	14 days before
BR-21	Document expiry reminders	30 days before
BR-22	Resigned or Terminated needs a complete offboarding checklist, unless an admin overrides with a reason	Fixed

ID	Rule	Default
BR-23	Monthly attendance report emailed on the 1st	On
BR-24	No money penalty for lateness	Fixed for v1

12. Data requirements

12.1 Entities

Entity	Key fields
users	id, employee_id, google_sub, email, last_login_at, is_active
employees	id, code, full_name, preferred_name, photo, work_email, job_title, department_id, team_id, location_id, employment_type, start_date, probation_end, contract_end, pay_currency, status, exit_date, exit_reason
employee_personal	employee_id, phone, personal_email, address, date_of_birth, emergency_name, emergency_relation, emergency_phone
reporting_lines	employee_id, manager_id, effective_from, effective_to
departments, teams	id, name; teams also department_id, lead_id, max_on_leave, clash_action
locations	id, name, country, time_zone, holiday_calendar_id, default_currency
roles, permissions, role_permissions, user_roles	role name and description; feature and action; scope (own, team, all); user-to-role links

Entity	Key fields
work_schedules	id, scope (location, team, employee), scope_id, mode (fixed, hourly), working_days, start_time, end_time, grace_minutes, half_day_hours, checkout_cutoff, weekly_hours
attendance	id, employee_id, work_date, check_in_at, check_out_at, latitude, longitude, location_label, ip, device, note, original_in, original_out, corrected
attendance_corrections	id, attendance_date, employee_id, requested_in, requested_out, reason, status, decided_by, decided_at
tasks	id, title, client, assignee_ids, created_by, due_date, status, external_ref (for the project module)
work_logs	id, employee_id, work_date, task_id, minutes, note, created_at
leave_categories	id, name, quota_days, period_start, period_end, paid, half_day, attachment_rule, notice_days, max_per_request, prorate, carry_mode, carry_cap, carry_expiry, negative_cap, applies_to
approval_steps	leave_category_id, step_order, approver_type, approver_ref
leave_requests	id, employee_id, category_id, start_date, end_date, half_day_part, days, reason, attachment, status, current_step, team_limit_exceeded
leave_approvals	request_id, flow (request or cancellation), step_order, approver_id, decision, comment, decided_by, decided_at, on_behalf
leave_balance_entries	employee_id, category_id, kind (opening, adjustment, carry, payroll), days, reason, payroll_month, by, at

Entity	Key fields
delegations	from_id, to_id, start_date, end_date
holidays	id, calendar_id, name, start_date, end_date, type, optional
salaries	employee_id, pay_type, amount, currency, effective_from, reason, set_by
payroll_runs	month, status (draft, final), finalised_by, finalised_at
payroll_lines	month, employee_id, snapshot of all calculated values, adjustment_amount, adjustment_note, net_pay
employee_documents	id, employee_id, type, file_ref, uploaded_by, uploaded_at, expires_on
checklist_templates, checklists, checklist_items	template items; per-employee items with owner, due, done_by, done_at
notifications	id, recipient_id, type, text, link, created_at, read_at, dedupe_key
email_outbox	id, recipient_id, to_address, month, subject, payload, sent_at, sent_by, delivery_status
audit_log	id, at, actor_id, action, entity, entity_id, before, after, ip
settings	work log rule, payroll rules, monthly email switch, notification switches

12.2 Data rules

ID	Requirement
DR-01	Dates are stored as calendar dates; times are stored in UTC and shown in the employee's location time zone
DR-02	Money is stored as decimal with 2 places in the employee's currency; no currency conversion in v1

ID	Requirement
DR-03	A finalised payroll line stores a snapshot, so later salary or attendance changes do not alter it
DR-04	Records are never hard-deleted except documents and log entries an authorised user deletes; employees who leave are kept with their history
DR-05	Attendance, leave, payroll and audit data shall be retained for at least 7 years, or as Qii's legal advice requires
DR-06	Go-live import: employees, managers, schedules, holidays, leave categories, opening leave balances and salaries, entered by admin or loaded from a CSV template

13. External interfaces

13.1 User interface

ID	Requirement
IR-UI-01	One web app for all roles; navigation shows only what the user's roles allow, grouped as Me, Team, HR and Settings
IR-UI-02	Check-in and check-out, work log entry, leave request and approvals must be fully usable on a 375 px wide phone screen
IR-UI-03	Screens follow the clickable prototype (version 2): Home, My attendance, My work log, My leave, My monthly reports, My profile, Approvals, Team attendance, Team work logs, Tasks, Leave calendar, Directory and org chart, Admin dashboard, Employees and employee detail, Payroll, Onboarding and offboarding, Reports, and the Settings pages

ID	Requirement
IR-UI-04	Every form validates on submit and states what is wrong and how to fix it
IR-UI-05	Dates show as "Mon 12 Oct 2026"; hours as "7h 45m"; money with the currency code

13.2 Other interfaces

ID	Interface	Requirement
IR-01	Google sign-in (OAuth 2.0 / OpenID Connect)	Restricted to the qiicreative.com.au domain; the system stores the Google subject ID and email only
IR-02	Email service	Sends notification and monthly report emails from a Qii address; records delivery status and retries failures 3 times
IR-03	File storage	Stores employee documents and leave attachments privately; files are served only through permission-checked, short-lived links. Maximum 10 MB per file; PDF, JPG, PNG, DOCX
IR-04	Browser location	Asked on check-in; refusal never blocks the check-in
IR-05	CSV export	UTF-8 CSV for every report, the dashboard table and payroll
IR-06	Project-management module (later release)	Shares employees, teams, roles and tasks; work logs attach to project tasks through the task reference

14. Non-functional requirements

ID	Area	Requirement
NFR-01	Security	All traffic over HTTPS (TLS 1.2+); data encrypted at rest
NFR-02	Security	Every API request checks the user's role, action and data scope on the server, not only in the interface
NFR-03	Security	Salary, payroll, ID copies and contracts are visible only to roles granted them; downloads are logged
NFR-04	Security	Protection against the OWASP Top 10, including CSRF, injection and broken access control; penetration test before go-live
NFR-05	Privacy	Location is captured only at check-in and check-out, never tracked in between
NFR-06	Privacy	Personal data can be exported for an employee on request
NFR-07	Performance	Pages load in under 2 seconds and check-in completes in under 1 second for 95% of requests, with 50 employees and 3 years of data
NFR-08	Performance	A monthly payroll run for 100 employees calculates in under 10 seconds
NFR-09	Availability	99.5% monthly uptime during 07:00–23:00 in each location's time zone; planned maintenance announced 48 hours ahead
NFR-10	Backup	Daily backups kept 30 days; recovery point under 24 hours, recovery time under 8 hours
NFR-11	Scalability	Supports at least 200 employees and 5 locations without redesign
NFR-12	Auditability	Audit log entries cannot be changed or deleted through the application

ID	Area	Requirement
NFR-13	Accuracy	Payroll and leave calculations are covered by automated tests using the worked examples in this SRS
NFR-14	Usability	A new employee can check in, log work and request leave without training
NFR-15	Accessibility	Meets WCAG 2.1 AA for contrast, keyboard use and form labels
NFR-16	Localisation	English interface; each location's time zone, weekend and currency are respected
NFR-17	Maintainability	Policy values live in admin settings; changing a rule needs no code change

15. Acceptance and traceability

15.1 Traceability to Qii's requests

Qii request	Date	Requirements
Leave set up by admin, e.g. Casual Leave 10 days for a year	12 Oct	FR-LV-01 to FR-LV-07
Everyone checks in through the system; office time and days set by admin	12 Oct	FR-SCH-01, FR-SCH-02, FR-ATT-01 to FR-ATT-08
HR or Admin enters staff and sets the hierarchy	12 Oct	FR-EMP-01 to FR-EMP-12, FR-ORG-04 to FR-ORG-07
Role-based access to every page and feature	12 Oct	FR-ACC-01 to FR-ACC-06
Google sign-in for all staff	12 Oct	FR-AUTH-01 to FR-AUTH-07
Check in from anywhere	12 Oct	FR-ATT-01, FR-ATT-02

Qii request	Date	Requirements
Leave approved by manager, then Fayaz, configurable	12 Oct	FR-LV-12, FR-LV-13
Work hours from punch in and punch out	19 Oct	FR-HRS-01 to FR-HRS-05
Mandatory work log against assigned tasks, visible to manager and admin	19 Oct	FR-TSK-01 to FR-TSK-04, FR-WL-01 to FR-WL-08
Salary entered by management; auto salary from leave and work days; deduction when absences exceed leave balance	19 Oct	FR-SAL-01 to FR-SAL-03, FR-PAY-01 to FR-PAY-16
5-day, 6-day and hourly employees	19 Oct	FR-SCH-03, FR-SCH-04, FR-PAY-07
Alert the manager when a second team member asks for leave the same day	19 Oct	FR-ORG-03, FR-LV-14, FR-NT-04
Monthly attendance report emailed to all employees	19 Oct	FR-MR-01 to FR-MR-05
Admin dashboard of daily, weekly and monthly hours and leave per employee	19 Oct	FR-DB-01 to FR-DB-06

15.2 Acceptance tests

Qii signs off v1 when each test passes on the staging system with Qii's real setup.

- [ ] AT-01 Only @qiicreative.com.au accounts with an Active record can sign in; a person with no role sees Access pending
- [ ] AT-02 Each page and action is hidden or allowed exactly as the permission matrix sets it, for Own, Team and All scope
- [ ] AT-03 A manager change that creates a loop is refused; a dated change keeps history
- [ ] AT-04 Check-in from a phone in another city records time, location and IP
- [ ] AT-05 Daily statuses are correct for a test month for a 5-day, a 6-day and an hourly employee
- [ ] AT-06 Worked hours per day, week and month match check-in and check-out

- [ ] AT-07 Check-out is refused until the day has a work log, and the rule can be switched to flag-only
- [ ] AT-08 Work log entries are possible only against tasks assigned to that person
- [ ] AT-09 Admin creates Casual Leave, 10 days, 1 Jan to 31 Dec, for Bangladesh staff
- [ ] AT-10 A request goes to the manager, then Fayaz; Fayaz's own request goes to Asman
- [ ] AT-11 Leave day counts exclude weekly days off and holidays; half days count 0.5
- [ ] AT-12 Overlapping, over-balance, short-notice and missing-attachment requests are refused
- [ ] AT-13 A second request from the same team on the same day alerts the manager; Block mode refuses it
- [ ] AT-14 Payroll for a test month matches a hand calculation, including the worked example in 8.2
- [ ] AT-15 Finalising payroll reduces leave balances for covered absences; reopening restores them
- [ ] AT-16 Every employee receives the monthly report email on the 1st
- [ ] AT-17 The admin dashboard shows hours, leave and absences per employee for a day, a week and a month, and exports
- [ ] AT-18 Every change listed in FR-AU-01 appears in the audit log with before and after values
- [ ] AT-19 Check-in, work log, leave request and approval work on a phone
- [ ] AT-20 Probation and contract reminders arrive 14 days before

16. Open questions and out of scope

16.1 Questions for Qii

The system works with the defaults shown; Qii's answers only change settings.

#	Question	Default in this SRS
Q1	Is the per-day rate salary ÷ working days in the month, or salary ÷ 30?	Working days
Q2	Which leave balances may cover an absence, and in what order?	Casual, then Annual; never Sick
Q3	Is overtime paid, or are extra hours only reported?	Reported only

#	Question	Default in this SRS
Q4	Should late arrivals ever reduce pay?	No
Q5	Do hourly staff's hours need manager approval before payroll?	No
Q6	Must payroll withhold tax or provident fund?	No
Q7	Which leave categories, quotas and holidays apply for 2026 and 2027, per country?	Admin enters at go-live
Q8	What is the go-live date, and which month is the first payroll run?	To be agreed
Q9	Which email address should the system send from?	hr@qiicreative.com.au

16.2 Out of scope for v1

- Hiring and recruitment pipeline (later phase)
- KPI scoring, bonus and Spark Awards (project-management release)
- Tax, provident fund, statutory deductions, bank payment files and overtime pay
- Client portal and native mobile apps
- Currency conversion between BDT and AUD

Appendix A. Daily status codes

Code	Status	When
P	Present	Checked in by start + grace, worked at least the half-day threshold
L	Late	Checked in after start + grace
HD	Half day	Worked less than the half-day threshold, no leave
M	Missing check-out	Checked in, no check-out by the cut-off
A	Absent	Past working day, no check-in, no approved leave
NC	Not checked in	Today, after start + grace, no check-in yet

Code	Status	When
OL	On leave	Approved leave covers the day or half of it
HO	Holiday	Non-optional holiday on the location's calendar
WO	Weekly off	Not a working day in the person's schedule

Hourly employees: P (worked), M (missing check-out) or no code (no shift).

Appendix B. Default permission matrix

Own = own records; Team = direct and indirect reports; All = everyone; Yes = feature without scope. Admin and Super Admin hold every permission at All.

Feature	HR	Manager	Employee
Directory	View all	View all	View all
Profile: personal	View, edit all	View team	View, edit own
Profile: employment	View, create, edit all	View team	View own
Documents	View, create, delete all	—	—
Org hierarchy	View	View	View
Leave categories	View, create, edit, delete	—	—
Leave requests	View all, create own	View, approve team	View, create own
Leave balances	View, edit all	View team	View own
Attendance records	View, edit, export all	View team	View own
Attendance settings	View, edit	—	—
Holiday calendars	View, create, edit, delete	View	View
Onboarding and offboarding	View, create, edit all	View, edit team	—

Feature	HR	Manager	Employee
Tasks	View all	View, create, edit team	View own
Work logs	View all	View team	View, create, edit own
Salary and payslips	—	—	View own
Payroll runs	—	—	—
Monthly report emails	View, send all	—	View own
Reports and dashboard	View, export all	View team	—
Roles and permissions	—	—	—
Audit log	—	—	—
